

Code No: 117BD

**R13**

**JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD**

**B. Tech IV Year I Semester Examinations, April/May - 2018**

**CAD/CAM**

**(Common to ME, AE, AME, MSNT)**

**Time: 3 Hours**

**Max. Marks: 75**

**Note:** This question paper contains two parts A and B.

Part A is compulsory which carries 25 marks. Answer all questions in Part A.

Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

**PART- A**

**(25 Marks)**

- 1.a) List out input and output devices of CAD. [2]
- b) What are the importance's of continuity curves? [3]
- c) What is subdividing? [2]
- d) Write the parametric equation of ruled surface [3]
- e) What do you understand the M and G functions? [2]
- f) Compare the NC, CNC and DNC [3]
- g) What is the need of part analysis? [2]
- h) What is composite part? Give an example of your own? [3]
- i) Define the FMS [2]
- j) What is the role of computers in quality control? [3]

**PART-B**

**(50 Marks)**

- 2.a) Compare the traditional and CAD/CAM of product cycle.
  - b) What are the applications of computer in design? [5+5]
- OR**
- 3.a) Differentiate between the interpolation and approximation of curves.
  - b) Derive the parametric equation for Hermite cubic curve? List out its characteristics. [5+5]
- 4.a) Define Bezier surface? Explain various characteristics of this surface.
  - b) A circle with radius 5 units having center located at point (20, 10, 0) is rotated about the x axis by an angle  $2\pi$  to obtain a surface revolution. Calculate the surface point at  $\theta=\pi$  and  $\Phi=\pi$ . [5+5]
- OR**
- 5.a) Enlist and explain with different Boolean operations in solid modeling.
  - b) Explain the cell decomposition and spatial occupancy enumeration. [5+5]
- 6.a) How are NC machines are classified? Explain them with neat sketches.
  - b) With neat sketches, write down the neat procedure for manual part programming. [5+5]
- OR**
- 7.a) Explain the concept of adaptive control of NC machines.
  - b) List out various types G and M codes functions. [5+5]

- 8.a) Discuss advantage and disadvantages of OPITZ code system.  
b) What is a production Flow Analysis? Discuss various steps involved in PFA. [5+5]

**OR**

- 9.a) How do you overcome the difficulties in traditional process planning by adopting CAPP method.  
b) Explain the machine cell design. [5+5]

10. Discuss the following types of layouts in the design of FMS.  
a) Circular layer  
b) Linear layers  
c) Loop layers  
d) Free layout. [10]

**OR**

11. Explain following inspection systems:  
a) On-line inspection  
b) Off-line inspection  
c) In-process inspection  
d) Process inspection. [10]

**--ooOoo--**
